

Dhwanit Shah

CS Student · Full-Stack Engineer · B.Tech Computer Science & Business Systems
dhwanitshah1309@gmail.com | linkedin.com/in/dhwanit-shah-11b781291 | github.com/Dhwanitishshah | Pune, Maharashtra

EDUCATION

B.Tech — Computer Science & Business Systems · Bharati Vidyapeeth (DU) College of Engineering, Pune | 2023 – 2027

- CGPA: 8.9 / 10 · President, Vigyanam Science Club · Treasurer, ACM Chapter · Co-Head R&D, Blotic

EXPERIENCE

Chief Information Officer (CIO) · GreenFlag | Jul 2026 – Present

- Lead technical architecture for an India-first dating platform — engineering roadmap, DPDP compliance, AI safety.
- Stack: NestJS backend, React Native/Expo client; responsible for architecture reviews and delivery.

Research & Engineering Intern · NTPC Limited | Jun 2025 – Nov 2025

- Conducted data analysis and process optimisation on operational datasets using Python automation.
- Delivered reproducible reporting pipelines that streamlined engineering workflows across departments.

Product & Engineering Intern · D.R.E.A.M. Labs | May 2026 – Present

- Developed sales playbooks for a website-building SaaS and reframed a product spec into SiteSignal — a web presence intelligence platform.

PROJECTS

Setu — DPDP-Compliant Clinic Triage Companion — Next.js 15 · TypeScript · Supabase · FastAPI · Groq LLM

- Production-grade multi-tenant triage platform for India's small clinics; integrates the clinical NEWS2 scoring standard with a deterministic rules engine and an AI summary layer.
- Full DPDP Act compliance: consent lifecycle, two-step patient erasure, data export, audit-log tombstones; Supabase RLS with 32/32 isolation checks passing.
- Real-time queue (616 ms propagation), single-use SHA-256 doctor share links, Groq AI summaries via Next.js after() — 232 tests passing. Phase 8 complete.

Ledgerline — Idempotent Payments Backend — FastAPI · PostgreSQL · Alembic · Docker · pytest

- Payment gateway eliminating double-charges via idempotency keys and database-level locking (SELECT FOR UPDATE / advisory locks).
- Double-entry accounting ledger: balances derived from immutable transaction entries — never a mutable column.
github.com/Dhwanitishshah/ledgerline

CV Interpretability — MobileNetV3 + Grad-CAM / LIME on CIFAR-10 — PyTorch · Grad-CAM · LIME · SciPy

- Trained four MobileNetV3-Small variants; implemented Grad-CAM from scratch with cascading-randomization sanity checks; ran deletion/insertion/ROAD faithfulness metrics (n=500) with TOST equivalence testing.
- Key finding: fine-tuned model is accuracy-robust yet explanation-unstable under corruption — a novel accuracy/faithfulness dissociation. Phase 7.5 complete; targeting first research paper.

Fake News Detector — End-to-End NLP Classifier — Python · DistilBERT · BiLSTM · Streamlit · LIME

- Compared TF-IDF + Logistic Regression (98.61%), BiLSTM (99.00%), and DistilBERT (99.87%) on 39,103-row ISOT dataset; shipped LIME explainability + source-credibility scorer on Streamlit Community Cloud.

ACHIEVEMENTS & LEADERSHIP

- SIH'24 Winner — Led a 6-member team at Smart India Hackathon 2024; AI-driven solution for sustainable industrial applications.
- President, Vigyanam The Science Club — Organised technical events and workshops for 200+ students.
- Treasurer, ACM Student Chapter · Co-Head R&D, Blotic · ~1,288 LinkedIn followers.

SKILLS

Languages: Python, TypeScript, JavaScript, SQL, Go (basic)

Backend: FastAPI, Next.js, Node.js, PostgreSQL, Supabase, Docker, REST APIs

Frontend: React, Tailwind CSS, HTML/CSS

ML & AI: PyTorch, MobileNetV3, Grad-CAM, LIME, DistilBERT, BiLSTM, Scikit-learn, Groq LLM

Tooling & Concepts: Git, Vercel, Claude Code, Alembic, pytest, Vitest, DPDP compliance, idempotency, double-entry accounting, RLS
